Installation

Requirements

ConvertixCheckout for Hyvä Theme

This module is compatible only with **Hyvä Theme**. Luma-based storefronts are not supported.

- Magento Community edition `2.4.4-p9`, `2.4.5-p8`, `2.4.6-p7`, `2.4.7-p1` or higher
- PHP `8.1`, `8.2`, `8.3` or `8.4`
- **Hyvä Themes** installed and activated
- Composer 2.x
- OpenSearch configured
- SSH/CLI access to the Magento server

Prerequisites

ConvertixCheckout for Hyvä Theme

This module is compatible only with **Hyvä Theme**. Luma-based storefronts are not supported.

Before Installation

Before installing the module, **it is strongly recommended to create a full backup of your Magento instance.**

Backup your Magento 2 instance

The backup feature is disabled by default. To enable, enter the following CLI command:

```
php bin/magento config:set system/backup/functionality_enabled 1
```

Then:

```
php bin/magento setup:backup --code --db
```

Restoring Magento 2 instance

First run:

```
php bin/magento info:backups:list
```

To check your backups saved into filesystem.

Then run:

```
php bin/magento setup:rollback -f 1434133011_filesystem.tgz -d 1434133011_db.sql
```

Replace **14134133011_** with your backup file name.

Composer repository file backup

```
cp composer.json composer.json.bak  
cp composer.lock composer.lock.bak
```

Recommended Testing Environment

Before deploying the module to a production store, it is strongly recommended to test the installation in a development or staging environment first.

Recommended environments:

- Development domain
- Staging server
- Local Magento instance

This helps validate:

- Theme compatibility
- Third-party module compatibility
- Checkout behavior
- JavaScript functionality
- Customizations specific to the store

Example:

```
dev.yourstore.com  
staging.yourstore.com
```

Installation Guide

ConvertixCheckout for Hyvä Theme

This module is compatible only with **Hyvä Theme**. Luma-based storefronts are not supported.

Maintenance Mode (Optional)

```
php bin/magento maintenance:enable
```

Installation Methods

Method 1 - Composer Installation (Recommended)

```
composer require tmgcode/module-convertixcheckout  
php bin/magento module:enable TmgCode_ConvertixCheckout  
php bin/magento setup:upgrade  
php bin/magento setup:di:compile  
php bin/magento setup:static-content:deploy -f  
php bin/magento cache:flush  
php bin/magento maintenance:disable
```

Method 2 - Manual Installation

Extract the module archive into:

```
app/code/TmgCode/ConvertixCheckout
```

Then run:

```
php bin/magento module:enable TmgCode_ConvertixCheckout  
php bin/magento setup:upgrade
```

```
php bin/magento setup:di:compile
```

```
php bin/magento setup:static-content:deploy -f
```

```
php bin/magento cache:flush
```

```
php bin/magento maintenance:disable
```
